INTERNATIONAL AS PSYCHOLOGY

Unit 2: Biopsychology, Development and Research Methods 1

Friday 17 January 2020 07:00 GMT Time allowed: 1 hour 30 minutes

Materials

For this paper you must have:

- a calculator, which you are expected to use where appropriate.

Instructions

- Use black ink or black ball-point pen.
- Fill in the boxes at the top of this page.
- Answer **all** questions.
- You must answer the questions in the spaces provided. Do not write outside the box around each page or on blank pages.
- All working must be shown.
- If you need extra space for your answer(s), use the lined pages at the end of this book. Write the question number against your answer(s).
- Do all rough work in this book. Cross through any work you do not want to be marked.

Information

- The marks for questions are shown in brackets.
- The maximum mark for this paper is 90.

For Examiner's Use	
Section	Mark

Section A: BiopsychologyAnswer **all** questions in the spaces provided.Only **one** answer per question is allowed.

For each question completely fill in the circle alongside the appropriate answer.

CORRECT METHOD

WRONG METHODS

If you want to change your answer you must cross out your original answer as shown.

If you wish to return to an answer previously crossed out, ring the answer you now wish to select as shown.

0 1

Below is a diagram of a motor neuron (**Figure 1**). Name the structures labelled **A–E**. Write the name of **each** structure in the relevant box.**[5 marks]****Figure 1**

Turn over for Section B

Turn over ►

Section B: Cognitive development

Answer **all** questions in the spaces provided.

0	6
---	---

Two brothers, Ben and Kit, were playing with their toy cars. Ben placed his red car in the toy box and went outside. Kit watched his mother move the red car and place it behind the cushion. She then asked Kit, "Where will Ben look for his red car when he comes back?" Kit answered, "Ben will look behind the cushion."

Explain what Kit's answer suggests about his development of a theory of mind.

Section C: Research methods 1

Answer **all** questions in the spaces provided.

Only **one** answer per question is allowed.

For each question completely fill in the circle alongside the appropriate answer.

CORRECT METHOD

WRONG METHODS

If you want to change your answer you must cross out your original answer as shown.

If you wish to return to an answer previously crossed out, ring the answer you now wish to select as shown.

A researcher investigated the effect of sleep disruption on learning and recall. In a research room at the university, 10 male university psychology students took part in both of the conditions shown below.

Condition 1: the participants were woken by a loud alarm as they slept (sleep disruption condition). Then they were allowed to go back to sleep. The following morning, the participants were given a list of 25 words to learn and recall.

Condition 2: the same participants were left to sleep undisturbed for the whole night (no sleep disruption condition). The following morning, the participants were given a similar list of 25 words to learn and recall.

The two conditions were separated by a week and the experiment was counterbalanced.

The researcher recorded the number of words correctly recalled in each condition.

Table 1: The mean number of words correctly recalled and the standard deviation for both conditions

	Condition 1 (Sleep disruption)	Condition 2 (No sleep disruption)
Mean	9	17
Standard deviation	2.5	1.5

1 1

What do the mean and standard deviation values in **Table 1** suggest about the participants' performances with sleep disruption and without sleep disruption? Justify your answer.

[4 marks]

1 2

Name an appropriate graph to display the mean values shown in **Table 1**.

[1 mark]

Name of graph _____

1 3

Briefly explain why the researcher should not generalise these results to all university students.

[2 marks]

Turn over ►

1 4

Identify the type of experiment used in this study.

Shade **one** box only.

[1 mark]

A Field

☐

B Laboratory

☐

C Natural

☐

D Observation

☐**1 5**

Name the experimental design used in this study. Justify your answer.

[2 marks]

1 6

Write a non-directional hypothesis for this study.

[3 marks]

1 7Outline **one** reason why researchers use counterbalancing.**[2 marks]**

1 8

Explain how counterbalancing could have been carried out in this study.

[2 marks]

1 9

The researcher wanted to investigate in more detail how the participants felt about the sleep experiment. He decided to carry out an unstructured interview with five participants from the original experiment. The five participants were selected randomly.

Explain how the five participants could have been randomly selected for the interviews.

[3 marks]

Turn over ►

2	0
---	---

Briefly discuss **one** limitation of using unstructured interviews in this study.

[4 marks]

2	1
---	---

During the interviews one student reported feeling anxious about the sleep experiment. Briefly explain how the researcher could have dealt with this issue at the end of the study.

[2 marks]

2	2
---	---

Explain how this research involved the collection of both qualitative and quantitative data.

[4 marks]
