INTERNATIONAL AS PSYCHOLOGY

Unit 2 Biopsychology, Development and Research Methods 1

Monday 11 January 2021 07:00 GMT Time allowed: 1 hour 30 minutes

Materials

For this paper you must have:

- a calculator, which you are expected to use where appropriate.

Instructions

- Use black ink or black ball-point pen.
- Fill in the boxes at the top of this page.
- Answer **all** questions.
- You must answer the questions in the spaces provided. Do not write outside the box around each page or on blank pages.
- All working must be shown.
- If you need extra space for your answer(s), use the lined pages at the end of this book. Write the question number against your answer(s).
- Do all rough work in this book. Cross through any work you do not want to be marked.

Information

- The marks for questions are shown in brackets.
- The maximum mark for this paper is 90.

For Examiner's Use	
Section	Mark
A

C	
TOTAL	

Section A: BiopsychologyAnswer **all** questions in the spaces provided.Only **one** answer per question is allowed.

For each question completely fill in the circle alongside the appropriate answer.

CORRECT METHOD

WRONG METHODS

If you want to change your answer you must cross out your original answer as shown.

If you wish to return to an answer previously crossed out, ring the answer you now wish to select as shown.

**0 1**Which of the following statements about the somatic nervous system is **FALSE**?Shade **one** box only.**[1 mark]****A** It contains motor pathways which control skeletal muscles.☐**B** It includes sensory pathways from sensory receptors.☐**C** It is further divided into the sympathetic and parasympathetic branch.☐**D** It maintains the communication between the central nervous system and the outside world.☐**0 2**

Name a sub-division of the central nervous system.

Section B: Cognitive DevelopmentAnswer **all** questions in the spaces provided.**0 6**

Briefly outline what Vygotsky meant by the zone of proximal development.

[2 marks]

0 7Briefly outline what is meant by equilibration **and** class inclusion in Piaget's theory of cognitive development.**[4 marks]**

0 8

Dan is 3 years old and plays with his 6-month-old sister, Mai.

0 8 . 1

Dan covers his face with his hands. When he takes down his hands, Mai is surprised and laughs.

Explain why Mai is surprised and laughs. Refer to object permanence in your answer.

[4 marks]

Question 8 continues on the next page

Turn over ►

When Mai gets upset and begins to cry, Dan tries to calm her down. He gives Mai his own favourite toy rather than her own favourite blanket.

Section C: Research Methods 1

Answer **all** questions in the spaces provided.

A psychology teacher noticed that students who attended a gym performed better in their A-level examinations than students who did not attend a gym. To investigate this she interviewed 30 A-level students from her school. Each student was asked the same 10 questions in the same order.

1	0
---	---

Write a suitable aim for the psychology teacher's investigation.

[2 marks]

1	1
---	---

Briefly describe what a hypothesis is.

[2 marks]

1	2
---	---

Before selecting a sample, psychologists identify a population.

Briefly outline what is meant by a population.

Turn over ►

1 7

The data the teacher collected was primary data.

Briefly describe what primary data is.

[1 mark]

1 8

The psychology teacher was concerned about demand characteristics.

Briefly explain **one** way the psychology teacher could have reduced the risk of demand characteristics in her interview.

[2 marks]

1 9

In order to find out more information, the psychology teacher decided to follow-up her research with a questionnaire. She created a questionnaire with open and closed questions.

Briefly describe what a closed question is.

[2 marks]

2 0

From the information provided by the questionnaire the psychology teacher calculated measures of central tendency for her students' gym use (number of hours per week).

She calculated the mean, mode and median for this data (see **Table 1**).

Table 1: Measures of central tendency for gym use (number of hours per week)

Measure of central tendency	Score
Mean	4.3
Mode	6
Median	5

The information in **Table 1** suggests a negative skew. Explain why.

[3 marks]
