INTERNATIONAL AS PSYCHOLOGY

Unit 2 Biopsychology, Development and Research Methods 1

Monday 10 January 2022 07:00 GMT Time allowed: 1 hour 30 minutes

Materials

For this paper you must have:

- a calculator, which you are expected to use where appropriate.

Instructions

- Use black ink or black ball-point pen.
- Fill in the boxes at the top of this page.
- Answer **all** questions.
- You must answer the questions in the spaces provided. Do not write outside the box around each page or on blank pages.
- All working must be shown.
- If you need extra space for your answer(s), use the lined pages at the end of this book. Write the question number against your answer(s).
- Do all rough work in this book. Cross through any work you do not want to be marked.

Information

- The marks for questions are shown in brackets.
- The maximum mark for this paper is 90.

For Examiner's Use

Section A: BiopsychologyAnswer **all** questions in the spaces provided.Only **two** answers per question are allowed.

For each question completely fill in the circle alongside the appropriate answers.

CORRECT METHOD

WRONG METHODS

If you want to change your answer you must cross out your original answer as shown.

If you wish to return to an answer previously crossed out, ring the answer you now wish to select as shown.

**0 1**

Below are five statements describing the role of adrenaline in the fight or flight response.

Identify the **two** statements that are correct.

Shade the box for each statement that is correct.

[2 marks]**A** Adrenaline increases the breathing rate.☐**B** Adrenaline leads to storage of energy.☐**C** Adrenaline lowers blood pressure.☐**D** Adrenaline lowers the heart rate.☐**E** Adrenaline narrows blood vessels.☐**0 2**

Briefly outline the function of endocrine glands.

[2 marks]

0 3

Describe the process of inhibition in relation to synaptic transmission.

[4 marks]

0 4

Some functions are only found in one hemisphere of the brain. What word is used to describe this?

[1 mark]

0 5

Benji is a split-brain patient who had his right and left hemispheres separated. After the operation, Benji took part in a research study. A picture of a bird was displayed in his left visual field. After the picture was displayed, Benji was asked to describe what he had seen. He could not describe the bird.

0 5 . 1

Explain why Benji was unable to describe the bird. Use your knowledge of split-brain research and language centres.

[3 marks]

0 5 . 2

Briefly explain **one** limitation of split-brain research.

[2 marks]

0 6

Chiara's grandfather had an accident. A brain scan shows damage to his Wernicke's area.

0 6 . 1

Describe how this damage might affect her grandfather's ability to use language.

[4 marks]

0 6 . 2

Explain how Chiara's grandfather may recover from the damage to his Wernicke's area. Use your knowledge of plasticity and functional recovery.

Section C: Research Methods 1

Answer **all** questions in the spaces provided.

Researchers investigated whether there was a difference between how mothers played with their daughters and how mothers played with their sons. They went to the local playground and asked mothers of children aged 2 years old if they would be willing to take part in the study. They asked each mother to come to the laboratory the following day and spend 30 minutes playing alone with her child.

On the day of the observation, the researchers took each mother and her child into a room and provided the same selection of toys for every observation. The researchers observed each mother–child pair separately while they were left alone in the room. The researchers made a video recording in order to analyse the behaviours observed between the mother and her child.

1	1
---	---

Identify the sampling technique used in this study. Explain **one** problem that might occur when using this sampling technique.

[3 marks]

1	2
---	---

Explain why it would be useful to carry out a pilot study for this observation.

[3 marks]

1 3

Identify **one** ethical issue in this observation. Explain how the researchers could have dealt with this issue.

[4 marks]

1 4

The researchers decided to use behavioural categories in their observation. What is meant by the term 'behavioural categories'?

[2 marks]

1 5

Give **one** operationalised behavioural category that the researchers could have used in this observation.

[1 mark]

Turn over ►

1	6
---	---

Briefly explain **two** strengths of conducting an observation.

[4 marks]

1	7
---	---

Identify **one** extraneous variable that the researchers controlled in this observation.
Explain why it was important to control this variable.

[3 marks]

1 8

The researchers were concerned about demand characteristics. Describe what is meant by demand characteristics.

[4 marks]

1 9

Briefly explain **one** way in which the researchers could have reduced the risk of demand characteristics in this observation.

[2 marks]

2 0

The researchers used 52 mother–child pairs in their study. 25% of the 52 mother–child pairs were mothers with their sons. Calculate the number of mother–son pairs that took part in the study.

[3 marks]
