INTERNATIONAL AS PSYCHOLOGY

Unit 2: Biopsychology, Development and Research Methods 1

Wednesday 29 May 2019 07:00 GMT Time allowed: 1 hour 30 minutes

Materials

For this paper you must have:

- a calculator, which you are expected to use where appropriate.

Instructions

- Use black ink or black ball-point pen.
- Fill in the boxes at the top of this page.
- Answer **all** questions.
- You must answer the questions in the spaces provided. Do not write outside the box around each page or on blank pages.
- All working must be shown.
- If you need extra space for your answer(s), use the lined pages at the end of this book. Write the question number against your answer(s).
- Do all rough work in this book. Cross through any work you do not want to be marked.

Information

- The marks for questions are shown in brackets.
- The maximum mark for this paper is 90.

For Examiner's Use	
Section	Mark
A	
B	
C	
TOTAL	

Section A: BiopsychologyAnswer **all** questions in the spaces provided.**0 1****Figure 1** is a diagram of the divisions of the human nervous system. The names of some of the divisions are missing.Complete **Figure 1** by writing the name of a division in each box.**[3 marks]****0 2**

Outline the process of synaptic transmission.

Section B: Cognitive developmentAnswer **all** questions in the spaces provided.Only **one** answer per question is allowed.

For each answer completely fill in the circle alongside the appropriate answer.

CORRECT METHOD

WRONG METHODS

If you want to change your answer you must cross out your original answer as shown.

If you wish to return to an answer previously crossed out, ring the answer you now wish to select as shown.

**0 5**

Which of the following terms is the name of Piaget's fourth stage of intellectual development?

Shade **one** box only.**[1 mark]****A** Concrete operational
☐
B Formal operational
☐
C Post-operational
☐
D Pre-operational
☐

0 6**Table 1** lists five terms used by Piaget.

For each definition, choose the correct term from **Table 1** and write it next to the definition in **Table 2**.

[4 marks]**Table 1**

Accommodation	Assimilation	Conservation	Egocentrism	Equilibration
---------------	--------------	--------------	-------------	---------------

Table 2

Definition	Term used by Piaget
Adding new experiences to an existing schema.	
Changing a schema or developing a new schema.	
The inability to see the world from another's perspective.	
Understanding quantity remains the same even if appearance changes.	

0 7

Briefly discuss **one** strength and **one** limitation of Piaget's theory of cognitive development.

[6 marks]

Turn over ►

0 8

Briefly outline what is meant by Vygotsky's concept of the zone of proximal development.

[2 marks]

0 9

Adam is a 3 year old who can complete a 4-piece wooden block task but he is unable to complete a 12-piece wooden block task. His 10-year-old sister Mai is helping him to complete the 12-piece wooden block task.

Briefly explain how the zone of proximal development could be involved when Mai helps her younger brother with the 12-piece wooden block task.

[2 marks]

A violation of expectation experiment was carried out with 4-month-old infants.

There were two conditions:

Condition 1: a short carrot moved behind a wall which had a window.

Condition 2: a tall carrot moved behind the same wall with the same window.

The short carrot did not appear in the window, as the window was too high (possible event). The tall carrot should have appeared in the window, but it did not appear (impossible event). The time each infant spent looking at the window was measured.

The findings are shown in **Table 3** below.

Table 3 Average time in seconds spent looking at the possible and impossible events

Condition 1 (possible event)	Condition 2 (impossible event)
14	28

1 0

With reference to Baillargeon's violation of expectation research, explain the findings in **Table 3**.

[2 marks]

1 1

Suggest **one** problem with the violation of expectation method of investigating infants' understanding of the physical world.

[1 mark]

Section C: Research Methods 1

Answer **all** questions in the spaces provided.

Only **one** answer per question is allowed.

For each answer completely fill in the circle alongside the appropriate answer.

CORRECT METHOD

WRONG METHODS

If you want to change your answer you must cross out your original answer as shown.

If you wish to return to an answer previously crossed out, ring the answer you now wish to select as shown.

A researcher wanted to investigate the relationship between age and memory.

She carried out a pilot study using 10 of her work colleagues who were in the office on that day. Her colleagues were aged between 26 and 65 years.

Each person was individually shown the same list of 20 words for 2 minutes. Each person was then given 4 minutes to recall as many of the words as possible.

The results are shown in **Table 4** below.

Table 4 Age of work colleagues and number of words recalled from list of 20 words

Participant	Age (years)	Words recalled
1	26	19
2	62	9
3	30	18
4	27	16
5	35	15
6	65	7
7	42	14
8	48	11
9	55	10
10	50	11

1 3

What type of sample was used in this study?

Shade **one** box only.

[1 mark]

A Opportunity

☐

B Pilot

☐

C Population

☐

D Random

☐**1 4**

Write a suitable hypothesis for this study.

[3 marks]

1 5

Explain **at least one** reason for using a pilot study in this research.

[4 marks]

Turn over ►

Table 4 is repeated below.

Table 4 Age of work colleagues and number of words recalled from list of 20 words

Participant	Age (years)	Words recalled
1	26	19
2	62	9
3	30	18
4	27	16
5	35	15
6	65	7
7	42	14
8	48	11
9	55	10
10	50	11

1 6

Calculate the mean age of participants from the data in **Table 4**. Show your calculations.

[2 marks]

1 7

Draw a scattergram using the data in **Table 4**. Label the axes. You do not have to provide a title for your graph. Use the graph paper below.

[4 marks]

1 8

Identify the type of relationship shown in the scattergram you have drawn in your answer to **Question 17**. Explain what the researcher could conclude from this relationship.

[3 marks]

Turn over ►

1	9
---	---

Briefly discuss **one** limitation of correlational research. Refer to this study in your answer.

[4 marks]

2	0
---	---

Outline **one** ethical issue that the researcher should have considered in this study.

[2 marks]

2 1

Explain how the ethical issue outlined in your answer to **Question 20** could have been dealt with in the design of the study.

[4 marks]

At the end of the study, the researcher wanted to further investigate the relationship between age and memory. She carried out a structured interview with each of her 10 work colleagues.

2 2

Outline the main features of a structured interview.

[2 marks]

2 3

Write a suitable closed question that could be used in a structured interview.

[1 mark]
