A study was carried out to investigate social facilitation. Twelve participants were asked to solve a simple puzzle. The time taken to solve the puzzle was measured. There were two groups:

Group A: 6 participants solved the puzzle independently, each working alone in a separate room.

Group B: 6 participants solved the puzzle independently, but all working in the same room.

The results were as follows:

Table 1 - Average number of minutes taken to solve the puzzle

Group A	18
