INTERNATIONAL AS PSYCHOLOGY

Unit 2 Biopsychology, Development and Research Methods 1

Friday 31 May 2024

07:00 GMT

Time allowed: 1 hour 30 minutes

Materials

For this paper you must have:

- a calculator, which you are expected to use where appropriate.

Instructions

- Use black ink or black ball-point pen.
- Fill in the boxes at the top of this page.
- Answer **all** questions.
- You must answer the questions in the spaces provided. Do not write outside the box around each page or on blank pages.
- All working must be shown.
- If you need extra space for your answer(s), use the lined pages at the end of this book. Write the question number against your answer(s).
- Do all rough work in this book. Cross through any work you do not want to be marked.

Information

- The marks for questions are shown in brackets.
- The maximum mark for this paper is 90.

For Examiner's Use	
Section	Mark
A	
B	
C	
TOTAL	

Section A: BiopsychologyAnswer **all** questions in the spaces provided.**0 1**

Describe Wernicke's area.

[2 marks]

0 2

Describe the functions of the central nervous system.

[4 marks]

0	3
---	---

Dmitry walks on some broken glass and cuts his foot.

Briefly explain how Dmitry's motor neurons will respond in this situation.

[2 marks]

0	4
---	---

Briefly evaluate studies into plasticity.

[4 marks]

Section B: Cognitive DevelopmentAnswer **all** questions in the spaces provided.**0 8**

What is meant by a schema?

[1 mark]

0 9

Piaget suggested that there are four stages of intellectual development in his theory of cognitive development.

Describe the **second** stage of Piaget's theory.**[6 marks]**

Extra space

Turn over ►

1	0
---	---

In a study, monkey **A** watches monkey **B** pick up a banana. While this is happening, the brain activity of both monkeys is being measured.

The researchers find that the same brain areas are active in both monkeys, even though monkey **A** does not move.

Using your knowledge of mirror neurons, explain why monkey **A** has the same brain activity as monkey **B**.

[3 marks]

Psychologists have suggested that in order to understand the behaviour of other people we have to develop theory of mind.

[20 marks]

Section C: Research Methods 1

Answer **all** questions in the spaces provided.

Only **two** answers per question are allowed.

For each multiple-choice question completely fill in the circles alongside the appropriate answers.

CORRECT METHOD

WRONG METHODS

If you want to change your answer you must cross out your original answer as shown.

If you wish to return to an answer previously crossed out, ring the answer you now wish to select as shown.

A university professor is worried about her students' learning in lectures. One behaviour she is concerned about is their use of phones. She asks a psychologist to investigate student behaviour during a 45-minute lecture.

Her students all agree to be part of this investigation and provide fully informed consent. They are aware that the psychologist is using video cameras to film the lecture. Afterwards, the professor gives the students a test on the content covered in the lecture.

The psychologist then watches the film and analyses the students' behaviour.

The psychologist records the time (in minutes) that any student spends using their phone.

1 2Identify **two** observation techniques that are used in this investigation.Shade **two** boxes.**[2 marks]****A** Controlled☐**B** Covert☐**C** Naturalistic☐**D** Overt☐**E** Participant☐**1 3****1**

What is meant by the term pilot study?

[1 mark]

1 3**2**

Explain why it would be useful to carry out a pilot study before this investigation.

[2 marks]

1 4

Identify the sampling method used in this investigation. Briefly explain your answer.

[2 marks]

Turn over ►

1 5 . 1

What is meant by the term population in psychological research?

[2 marks]

1 5 . 2

Identify the population in this investigation.

[1 mark]

1 6

Protection from harm and confidentiality are two ethical issues.

Explain why the psychologist needs to consider protection from harm **and** confidentiality in this investigation.**[4 marks]**

1	7
---	---

The psychologist records the time in minutes each student spends on their phone during the 45-minute lecture.

Suggest **one other** operationalised behavioural category the psychologist might use in this investigation.

[2 marks]

1	8
---	---

Identify **one** type of data the psychologist collected. Briefly explain your choice.

[2 marks]

Turn over for the next question

Turn over ►

Table 1 shows the data of six students. The psychologist analysed this by correlating their test scores (out of 15) with the times spent on their phones.

Table 1 A table to show phone use (in minutes) and test score (out of 15) for six students

Student	Phone use (in minutes)	Test score (out of 15)
1	14	1
2	5	12
3	0	2
4	8	0
5	3	0
6	7	3

1 9 . 1

Using the information from **Table 1**, draw an appropriate graph to display the data. You should include a title and label your graph appropriately.

[4 marks]

Title _____

**1 9 . 2**

What does the graph you have drawn in Question **19.1** suggest?

[2 marks]

Turn over ►

2 0 . 1 Using the data in **Table 1**, calculate the median test score.

Show your workings.

[2 marks]

2 0 . 2 Explain why the range may **not** be a representative measure of dispersion for the test scores in **Table 1**.

[2 marks]

2 1 Apart from ethical issues, briefly explain **one** limitation of using an observation technique.

[2 marks]
