INTERNATIONAL AS PSYCHOLOGY

Unit 2 Biopsychology, Development and Research Methods 1

Friday 30 May 2025

07:00 GMT

Time allowed: 1 hour 30 minutes

Materials

For this paper you must have:

- a calculator, which you are expected to use where appropriate.

Instructions

- Use black ink or black ball-point pen.
- Fill in the boxes at the top of this page.
- Answer **all** questions.
- You must answer the questions in the spaces provided. Do not write outside the box around each page or on blank pages.
- All working must be shown.
- If you need extra space for your answer(s), use the lined pages at the end of this book. Write the question number against your answer(s).
- Do all rough work in this book. Cross through any work you do not want to be marked.

Information

- The marks for questions are shown in brackets.
- The maximum mark for this paper is 90.

For Examiner's Use	
Section	Mark
A

Section A: Biopsychology

Answer **all** questions in the spaces provided.

0 1

What is meant by localisation of function in the brain?

[1 mark]

0 2

Name a localised area of the brain **and** outline its function.

[2 marks]

0 3

Using **one** example of a named gland, briefly explain the function of glands **and** hormones in the human body.

[3 marks]

0 4

Describe the function of the peripheral nervous system.

[4 marks]

0 5Explain **one** strength of split-brain research.**[4 marks]**

Turn over for the next question

0 6

Describe the procedure **and** findings of **one** study into plasticity.

[4 marks]

0 7

Mariam is pouring hot water into her cup. She pours some water over her fingers and quickly drops the cup.

Using your knowledge of the functions of sensory neurons **and** relay neurons **and** motor neurons, explain why Mariam drops the cup.

[6 marks]

This image shows a blank sheet of white paper with horizontal ruling lines. The lines are evenly spaced and extend across the width of the page. There are no margins, text, or other markings on the paper.

Turn over for the next section

Section B: Cognitive DevelopmentAnswer **all** questions in the spaces provided.Only **one** answer per question is allowed.

For each multiple-choice question completely fill in the circle alongside the appropriate answer.

CORRECT METHOD

WRONG METHODS

If you want to change your answer you must cross out your original answer as shown.

If you wish to return to an answer previously crossed out, ring the answer you now wish to select as shown.

**0 9**Which of the following terms is **not** part of Piaget's theory of cognitive development?Shade **one** box only.**[1 mark]****A** Conservation☐**B** Egocentrism☐**C** Equilibration☐**D** Scaffolding☐**1 0**Describe how Piaget explains schema development through the processes of assimilation **and** accommodation.**[3 marks]**

Evaluate research investigating the role of the mirror neuron system in social cognition.

This image shows a blank sheet of white paper with horizontal ruling lines. The lines are evenly spaced and extend across the width of the page. There are no margins, text, or other markings on the paper.

Yonda is 6 months old and takes part in a violation of expectation study. She is shown a truck moving along a track and disappearing into a tunnel.

Condition 1: the truck enters the tunnel and can be seen coming out of the tunnel.

The researcher found that Yonda looked at the tunnel for longer in **Condition 2** than in **Condition 1**.

ANSWER IN THE SPACES PROVIDED**

Section C: Research Methods 1

Answer **all** questions in the spaces provided.

A psychologist aims to investigate the possible relationship between playing sports and mathematical ability. For her study, she uses 20 tennis players from the local tennis club.

To collect the data for her co-variables, the psychologist asks every tennis player how many years they have been playing tennis.

She also gives each of the 20 tennis players a mathematics test with a maximum score out of 50.

1	3
---	---

What is meant by co-variables?

[1 mark]

1	4
---	---

Identify the co-variables in this study.

[2 marks]

1	5
---	---

What is meant by the hypothesis in a study?

[2 marks]

1 6

Write an appropriate non-directional hypothesis for this study.

[3 marks]

1 7

Explain why it is important to consider ethics in the design and conduct of psychological studies.

[3 marks]

Turn over for the next question

1 8

Consent is an ethical consideration.

Explain what information the psychologist should provide to the tennis players to enable them to give their consent to take part in the study.

[4 marks]

1 9

What is meant by a positive correlation?

[2 marks]

The psychologist decides to do a follow-up experiment with the same 20 tennis players to see if playing tennis has a direct effect on the ability to solve mathematical questions.

For this experiment, she paired up the tennis players on their mathematical ability by using their scores on the mathematics test they had done previously.

Each tennis player takes part in **one** of the following conditions.

Condition 1: playing tennis for 60 minutes.

Condition 2: sitting quietly for 60 minutes.

After the 60 minutes, the tennis players were asked to answer a new mathematical test.

2	0
---	---

Identify the experimental design used in this study. Briefly explain your answer.

[2 marks]

2	1
---	---

Describe how the psychologist could have randomly allocated the players to the two conditions of the experiment.

[3 marks]

2 2

Identify the fully operationalised independent variable of this experiment.

[2 marks]

2 3Identify **one** extraneous variable in the follow up experiment. Briefly explain how this extraneous variable might affect the results.**[2 marks]**

2 4

What is meant by demand characteristics?

[2 marks]

2 5

Briefly explain how demand characteristics could have affected this study.

[2 marks]
